**This is created in view
that it is directly link to
Whatapps**

DREC Reverse Diabetes Patient View

Upon sign up, the system will send a whatsapp (not telegram) message to patient to arrange for

1. First appointment (within 7 days on sign up)

2. List of material to prepare (as per in the message)

- lab test
- 3 days of diet photo
- 3 days of sugar trend (1 fasting sugar and 1 after meal sugar)
- list of medication and supplement.

3. Link to some welcome videos

And this message is sent by our software AI

- all the reply will be capture and recorded in the software

During 1st appointment Onboarding

We will do a online clerking to get patient details and fill up this enrolment form together with patient.

This include our T&C. Also non refundable term.

During this session will also teach patient how to download this app and walkthrough of how to use this app.

The screenshot shows the 'DREC Healthcare Academy' onboarding interface. At the top, a blue header bar contains the logo and text 'DREC Healthcare Academy' and '100-Day Diabetes Reversal Journey · 100天逆糖之旅'. A green button labeled 'Official Enrollment · 正式报名' is on the right. Below the header is a dark red banner. The main content area has a white background with a blue title 'DREC 100-Day Reversal Journey: Official Enrollment' and subtitle 'DREC 100天逆糖之旅 · 正式报名与承诺书'. It shows the email 'drechealthcare.cs@gmail.com' and a 'Switch account' link. A progress bar indicates 'Step 1 of 5' with 'Welcome · 欢迎' and a 20% completion status. Below the progress bar is a horizontal navigation bar with five steps: 1 Welcome, 2 Basic & Health, 3 Lifestyle, 4 Dietary, and 5 Review. The 'Welcome' step is active. A 'Welcome to DREC' message with a hand icon says '欢迎加入 — 让我们先认识一下您的饮食治疗师'. Below this is a form for 'Dietitian in charge · 饮食治疗师' with a dropdown menu showing 'Choose — 请选择'. At the bottom, there is a blue 'Next →' button and a 'Clear form' link.

Patient View of the APP

On the home page,

patient get to

- view their progress
- know their upcoming appointment
- get to update their sugar level and diet photo , health condition manually

Refer : DREC patient UI

Patient View of the APP

The screenshot shows a mobile app interface for logging blood glucose. At the top, there's a title bar with a green status indicator and the text 'Log Blood Glucose 记录血糖'. Below this, a section titled 'READING TYPE 血糖类型' contains three toggleable options: 'FBS 空腹' (selected), '2hPP 餐后2小时', and 'Random 随机'. A small explanatory text below reads: 'FBS = fasting before breakfast · 2hPP = 2 hours after a meal · Random = any other time'. The main section, 'YOUR READING 血糖读数', features a large input field with the value '6.1'. To the right of the input are up/down arrow buttons and unit selectors for 'mmol/L', 'mg/dL', and 'mmol/L'. Below the input is a horizontal target range bar with a blue segment on the left and a green segment on the right. A green feedback message states: 'In target range for fasting (3.9 – 7.0 mmol/L) · 空腹目标范围内, 继续保持!'. Below this is a row of circular buttons with values: 4.5, 5.5, 6.5, 7.0, 7.5, 8.0, and 9.0. The 'WHEN DID YOU TAKE IT? 测量时间 (自动填写, 可修改)' section includes a date picker showing '19/04/2026' and a time picker showing '07:18'. A note below says: 'Auto-filled to now. Tap to edit if you tested earlier.' At the bottom, there are two buttons: 'Cancel' and 'Save reading · 保存记录'.

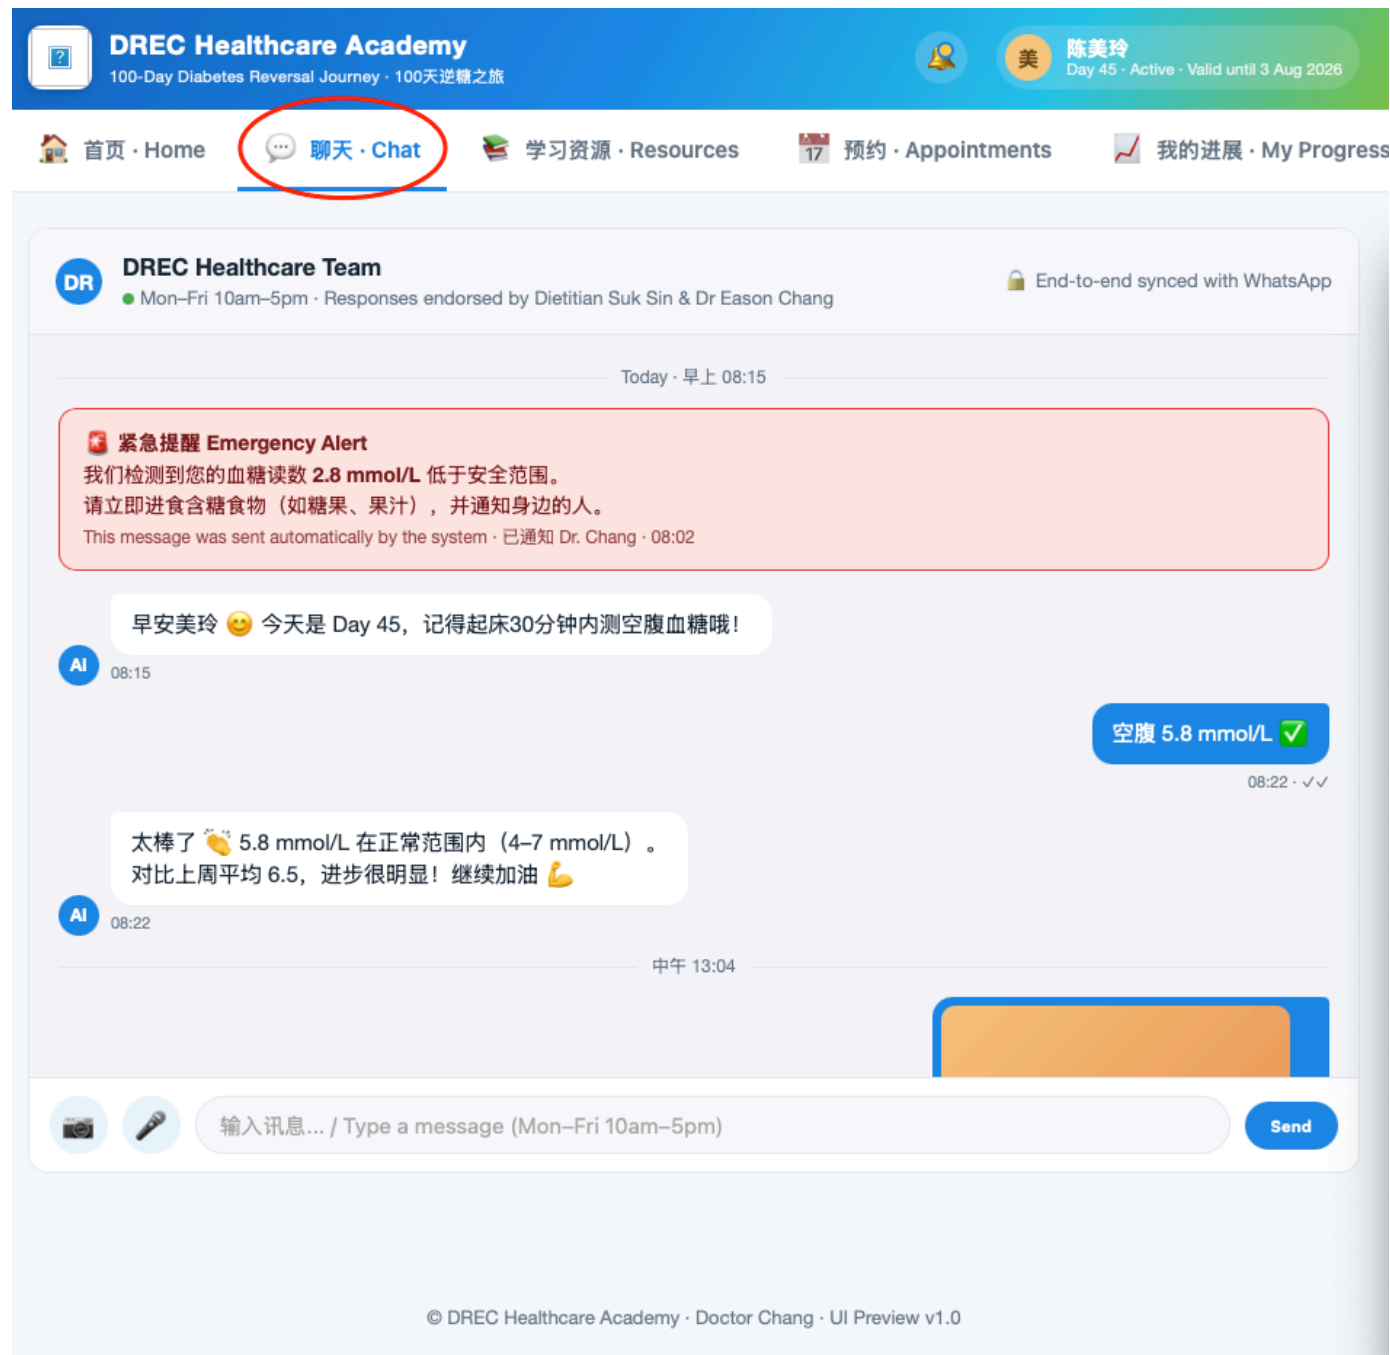

Flow 1: Log Blood Glucose — FBS / 2hPP / Random toggle · auto date-time (editable) · live target-zone feedback · optional context tags + note

To log sugar level

And few others, refer to the html file

Need to reschedule?

 Before each consultation

- Charge your device and test Zoom 10 minutes before the session.
- Make sure your latest glucose readings, meal log, weight & waist are updated.
- Upload latest medical report if requested (optional for 4th appointment).
- Find a quiet place with good lighting.

© DREC Healthcare Academy · Doctor Chang · UI Preview v1.0

Appointment tab

- get to view slide (which will be released after each appointment)

AI will generate a draft version, it will then be taught to patient during appointment then do the necessary adjustment , only then it it confirmed release to patient.

- on this tab, patient also get to adjust their appointment according to their respective dietitian availability

Refer : DREC patient UI

Patient View of the APP

My progress tab

- a more comprehensive progress dash board which include the lab result as well.

DREC Reverse Diabetes

Admin View

Chat tab

Left : List of patients (can be filtered by dietitian assigned)

Middle chat box linked to whatapps hence patient can actually chat with us via whatappa

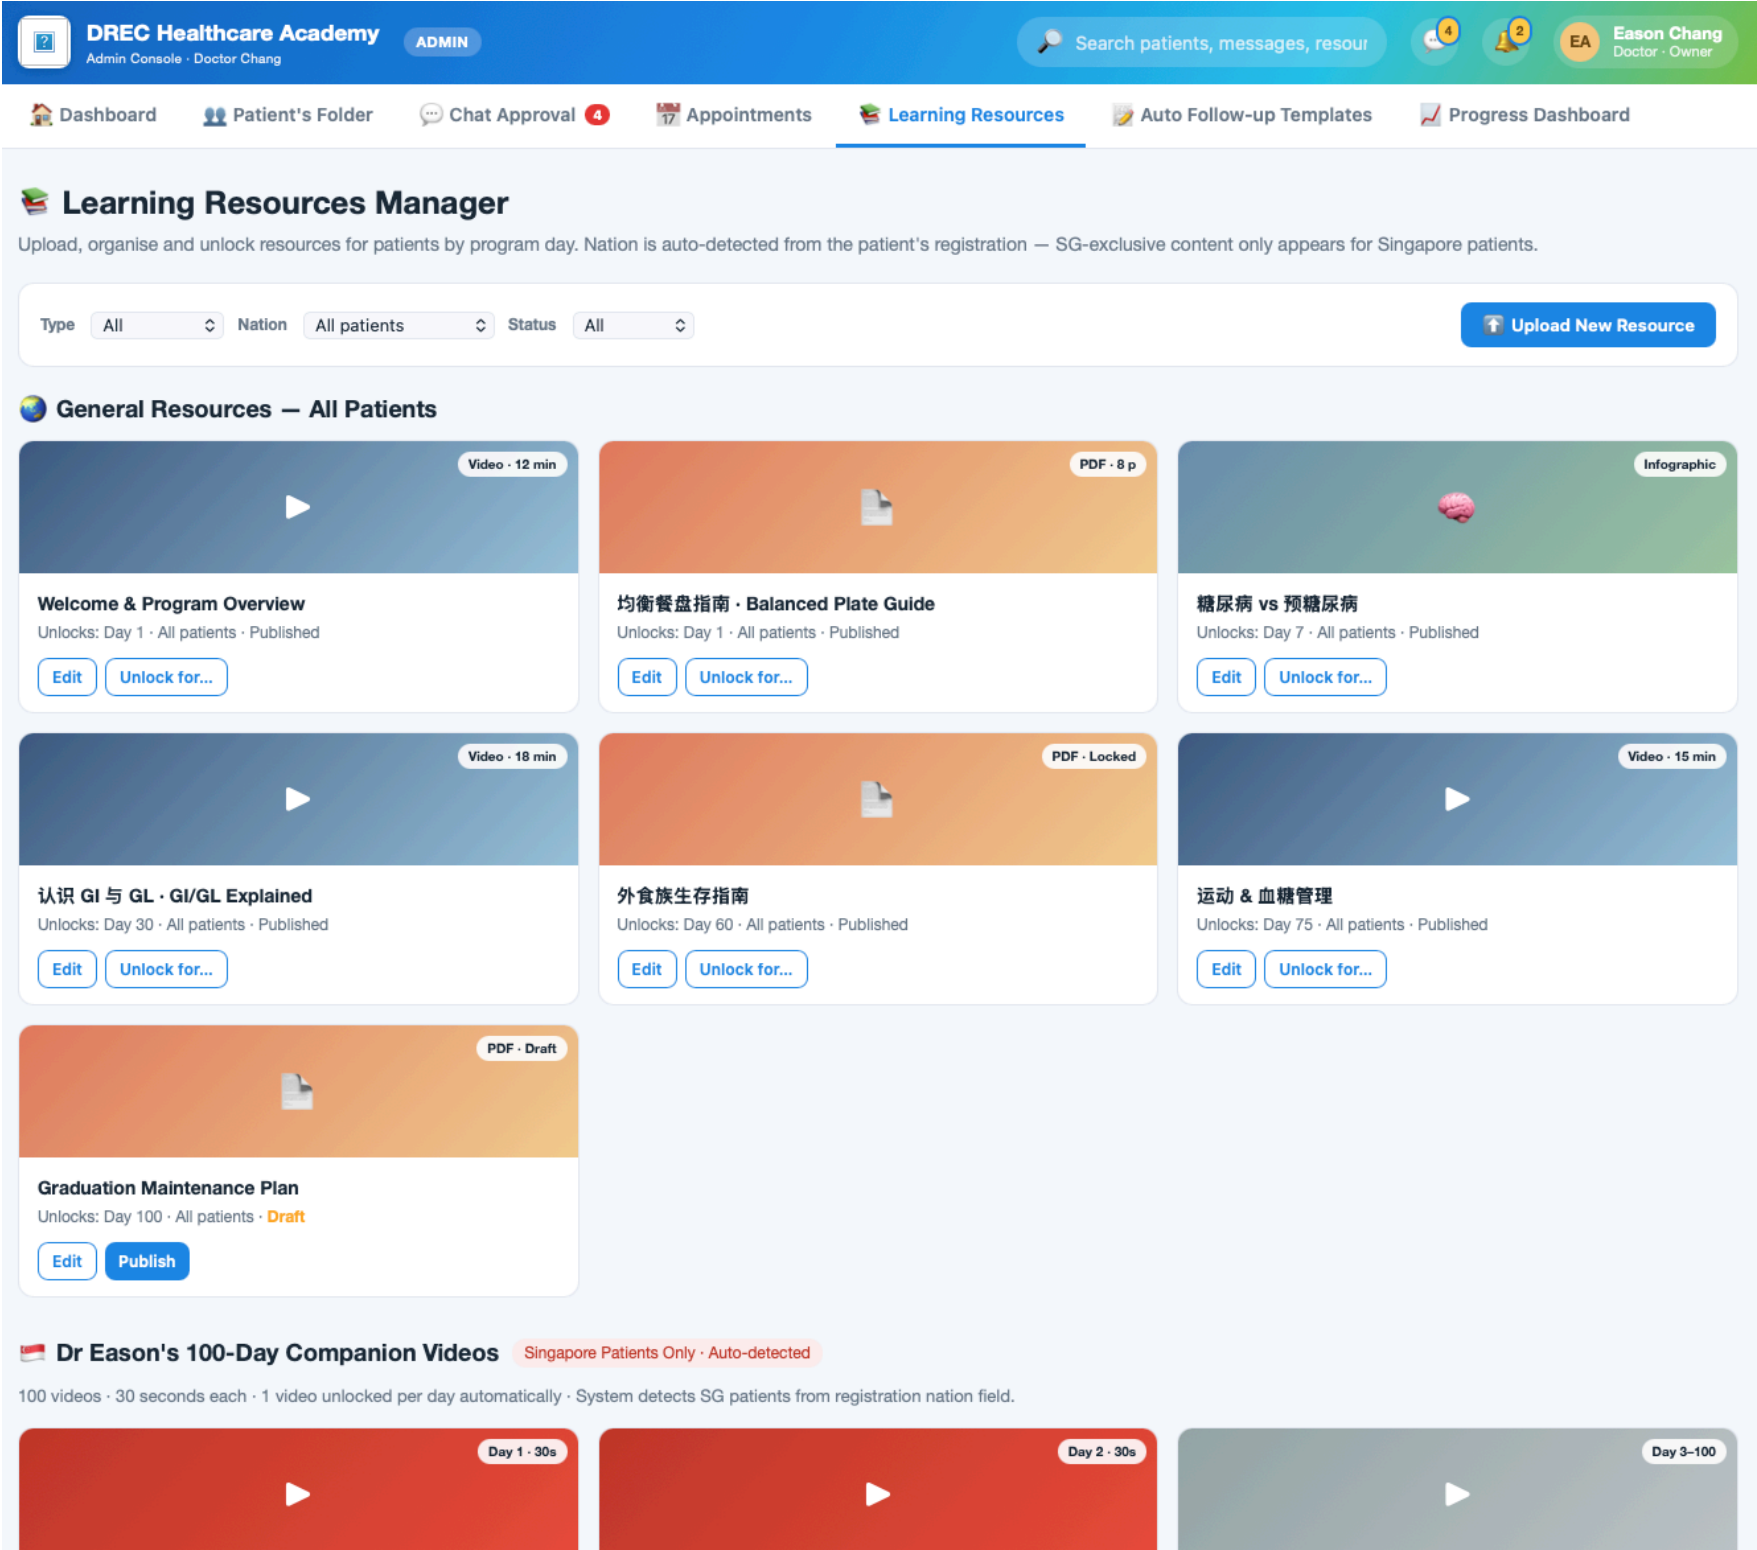

Right: Summary of patient (current disease, medication list, sugar trend)

Bottom: AI generated reply pending approval to send

AI: need to capture patient chat details and record into patient folder (eg patient say their sugar is now 6.0, AI auto capture and record into patient folder)

Details of AI job in (DREC AI Jobscope word document)

Refer : DREC Admin UI

Learning tab

- upload videos and pdf here
- video can be uploaded like a series, which I might have multiple series
- admin have the right to release according to patient name or patient “Tag”, example a patient tagged with “ Singapore” will auto get to receive certain video unlocked

"#2024 DREC 目标达成! 🎉 感谢团队支持!"

Company performance progress

- get to monitor overall patient progress
- each dietitian performance

patient will be labelled as “improving” “Stagnant” “worsening”

Refer : DREC Admin UI

Power point of each appointment

- patient details**
- patient health trend**
- upcoming lifestyle changes homework**

It has been powerpoint version, but with this new ai , I intend to develop upcoming in pdf version (will attach English copy for reference)

Brain AI

Nurse AI

- to collect data from whatapps
- to store in respective patient folder
- to summarise each patient file
- to capture all the good testimony in screenshot for future marketing

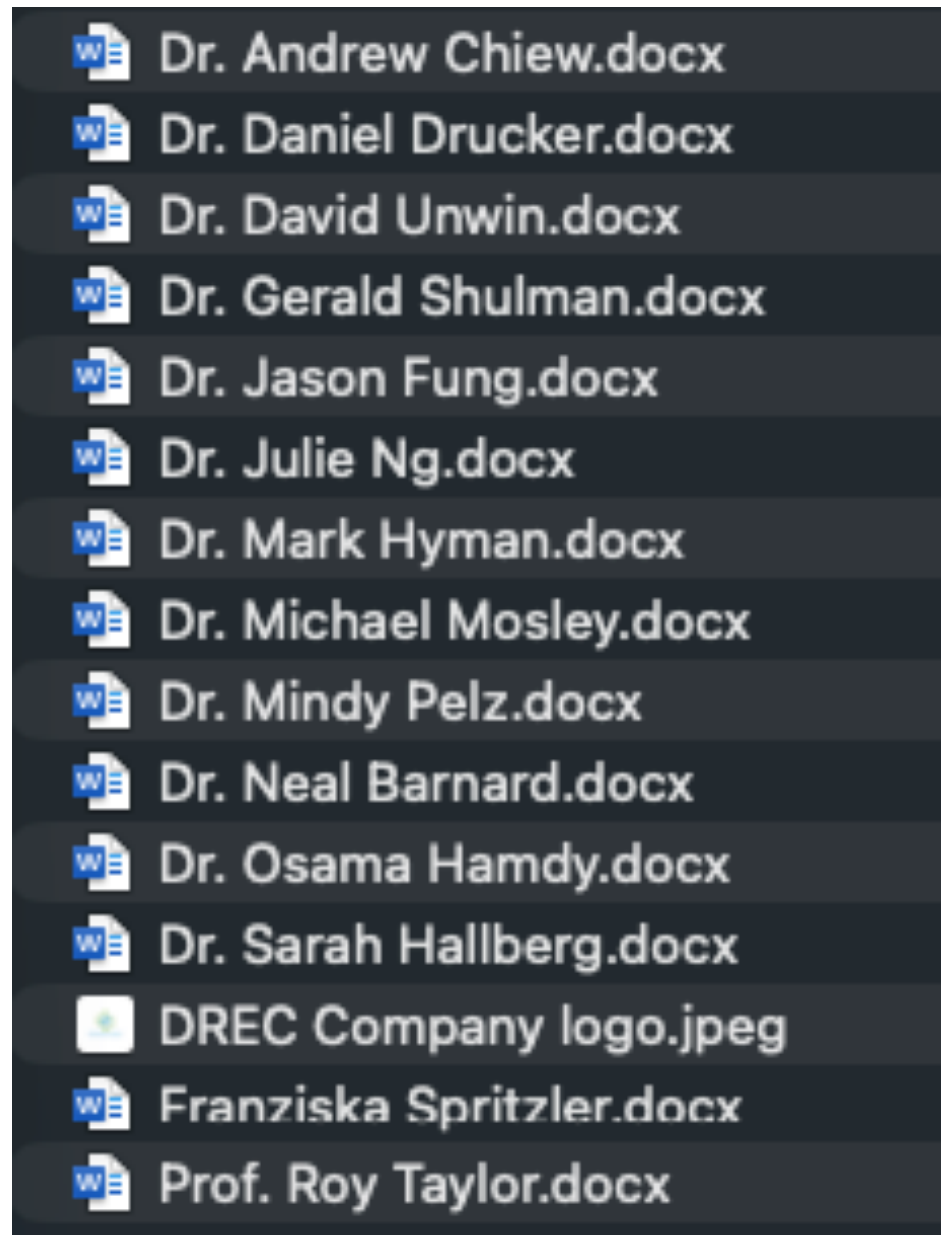

Dr Eason AI

- a table of professional including (endocrinologist, dietitian, nutritionist, pharmacist and some other specialist in reversing diabetes)
- to answer in whatapps based on the patient condition and active complaint
- to prepare patient reversal plan before each appointment

For the AI, I not sure if it can be combined as one or separate as two.

Refer: DREC AI jobscope

Dr Eason Brain AI

Consist of a group of specialist

**I have also asked Claude to prepare a write up in word document. Can refer to
DREC Software developer walkthrough**

Nurse AI
